TECHNICAL SPECIFICATIONS

- Tested to 140 kg
- Primary webbing in polyester 44 mm wide (R > 27 kN)
- Simultaneous shoulder and legs straps adjustment through zinc plated male-female quick buckles
- Back fall arrest attachment point on steel D ring or on 30 cm long extension strap
- Front fall arrest attachment point on web loops to connect together
- Padded belt with 2 lateral D rings and 4 tool-holders
- Secondary chest strap 25 mm wide
- Static resistance > 15 kN
- Universal size
- Weight : 1,3 Kg

DESCRIPTION

Harness with two fall arrest attachment points in the back, either on the steel D ring or on the extension strap, and one fall arrest attachment point in the front by connecting the 2 webbing loops. The extension strap when not used can be fixed onto shoulder strap through Velcro tape. A padded belt with 2 lateral D rings and four tool-holders is integrated to this harness.

USE

Full body harness to use in case of fall hazard.
